Congestion caused by our outdated infrastructure keeps us from doing our jobs, and it costs us $160 billion annually. It's time for Congress to fix our roads and bridges and get America moving again.

Let's get back to work

Congestion isn’t just annoying, it also drives up the cost of everything we make, buy or export — costing our country $160 billion every year. It’s time for Congress to invest in transportation infrastructure and keep our economy moving.

Public Health Alert: Nearly 36,000 are killed on America's roadways each year. It's time for Congress to make our roads and bridges safer. We need a plan to fix our roads, highways and bridges now so more people can get back to work safely.

Fix our unsafe infrastructure
